Request for Information

1. At the present time the most critical aspect of intelligence on the Soviet aircraft industry is the quantity of BISON bombers being produced by the USSR. [REDACTED] BISON production takes place at one plant, Factory No. 23 in Moscow.

25X1X1

2. Until approximately July of this year, observations of Factory No. 23 in order to determine the number of BISON produced were relatively frequent. After July observations dropped off because, [REDACTED] surveillance had become increasingly severe. The result of the decrease in observations has been to make it far more difficult to reach a unified intelligence community estimate of BISON production.

25X1X6

3. It is therefore requested that a major effort be undertaken as soon as possible to observe Factory No. 23 in Moscow on a regular and continuing basis so that it will be possible to keep a running account of production at the plant. Attempts should
